

**An Intelligent Platform Empowering
African Communities**

The Challenge

Existing Solutions

Several solutions already exist, but they still have significant limitations.

- Business owners are often forced to become content creators or influencers instead of focusing on their core activities.
- High costs associated with creating and publishing content.
- Expensive subscription fees for digital platforms.
- Platforms are often difficult to learn and use.
- Finding reliable local service providers remains a challenge.

Miadô : A Game Changer

**Connecting local service
providers with their customers.**

Objectives

**Increase the visibility of
local service providers**

**Promote local talent and
showcase our
homegrown expertise**

**Make everyday service
easier to find and
access**

AI Empowering Communities

- ❖ **Intelligent matching**
- ❖ **Personalized user experience**
- ❖ **Security and trust**
- ❖ **Dedicated support for service providers**
- ❖ **Integrated AI assistant with support for local languages**

Miadô's Roadmap

Short Term (0–12 Months)

- Develop and launch the MVP
- Test the platform with early adopters
- Validate the business model and continuously improve the user experience through real-world feedback

Medium Term (1–3 Years)

- Scale the platform nationwide
- Introduce advanced AI features and additional services such as payments, bookings, and personalized recommendations
- Build an active community of thousands of users

Long term (3–5 ans+)

- Expand across West Africa
- Build a digital ecosystem that empowers micro-entrepreneurs
- Establish Miadô as Africa's leading AI-powered local services platform

Business Model • Financial Impact • Funding Needs

Business Model

- Premium subscriptions for service providers
- Commissions on bookings and customer-service provider matches
- Targeted advertising and sponsored listings for service providers
- Partnerships with businesses and institutions
- Value-added AI services, including analytics, recommendations, and business management tools

Expected Financial Outcomes

- Short term : Validate product-market fit and generate the first revenue streams
- Medium term : Achieve profitability through user growth and premium subscriptions
- Long term : Build a profitable, scalable platform, expand across West Africa, and generate recurring revenue from subscriptions, commissions, and AI-powered services

What We Need to Launch Miadô

- Development and completion of the MVP
- Cloud hosting and technical infrastructure
- Building an initial network of service providers
- Marketing, communication, and early user acquisition
- Legal and administrative support
